

It's Easy to Make
Lasting Impressions Every Day

**LET YOUR CONFIDENCE SHINE THROUGH
WITH A WHITER SMILE**

ez·white[®] PRO
IN-OFFICE WHITENING SYSTEM

For the Moments That Matter Most

AN EASIER WAY TO WHITEN YOUR TEETH

AND BOOST YOUR
CONFIDENCE IN AS LITTLE
AS 30 MINUTES

EZ White® Pro In-Office Teeth Whitening System works differently than other professional whitening treatments. It uses an innovative, light-activated technology that takes as little as 30 minutes to brighten your smile, with little to no sensitivity associated with the procedure.

ENVISION YOURSELF WITH A WHITER SMILE

Before treatment
with EZ White® Pro

After treatment:
See immediate results
with rapidly whiter teeth

IS EZ WHITE® PRO RIGHT FOR YOU?

1 What is EZ White® Pro?

It's an innovative teeth-whitening treatment administered by your dentist in as little as 30 minutes and with little to no sensitivity.

2 How long does it take?

EZ White® Pro is performed by your dentist in as little as 30 minutes during one convenient office visit with no follow-ups required.

3 Is teeth whitening safe?

Yes. Whitening with approved hydrogen peroxide and carbamide peroxide products has been proven safe through extensive research. Your dentist can provide you with the complete safety information associated with EZ White® Pro.

4 Why professional whitening?

Your dentist has the professional whitening experience to quickly and safely achieve deeper, long-lasting results. Over-the-counter (OTC) products, like toothpastes and strips, are minimally effective in removing surface stains.

5 Does EZ White® Pro cause tooth sensitivity?

EZ White® Pro effectively whitens teeth with little to no sensitivity because it uses a patented light-activated technology to rapidly whiten teeth.

6 How long does my whiter smile last?

Results depend on many factors including tooth structure, personal habits, physical health, and oral hygiene. To maintain whitening results, consult with your dentist.

A woman with voluminous curly hair is smiling broadly, showing off her white teeth. She is wearing a bright pink top and is seated in a dental chair. A dentist, seen from the side, is leaning over her, likely performing a procedure. The background shows a modern dental office with red shelves holding various items.

EXPERIENCE THE EZ WHITE® PRO DIFFERENCE

- Results in as little as 30 minutes
- Little to no sensitivity associated with the procedure
- One convenient office visit for long-lasting results
